

Professional Learning for teachers and administrators

SMART amp™ collaborative learning software

Overview

SMART amp collaborative learning software is a revolutionary educational tool that embraces the power of student personal devices. With seamless transition between lessons and activities, SMART amp optimizes your current classroom technology and makes the most out of every minute in the classroom.

SMART provides valuable training, professional development and support resources, helping you use SMART hardware and software to its full potential.

There are multiple self-paced online courses and bundles available. By enrolling, you'll develop pedagogical and product-usage skills and your achievements will be globally recognized.

These courses cover topics on a variety of products, including frameworks for guidance and adoption, feature walk-throughs and opportunities to update select past certifications.

Find courses and other resources to ensure you have the skills and confidence to use SMART solutions effectively in the classroom.

See smarttech.com for more information on this product.
