

PHP SIX WEEKS.

PHP: Hypertext Preprocessor is the general-purpose programming language for the server side scripting language for the web development. In addition, the codes have the capability of deploying on the most web servers, operating systems and platforms for GUI applications. The three things that make it popular are that it is easy: easy to use, easy to learn, easy to implement. Even it is free and runs on almost any web server. It is both a scripting language and a collection of tools to perform various functions in an HTTP and web. It can create dynamic and static web sites. However to be a dynamic developer there are plenty of institutes dealing with this course. The courses on PHP, enables the learner to be a creative and innovative designer over HTTP. Indeed to mention regarding the trainers, the institute should have dynamic and professionals expertise to provide the entire concept in a delicate and in a lucid manner. Among various training classes, DUCAT is one those, having handy experience trainers to deliver the best concept to the students. The team of professionals over this institute has wide spectrum to make the dreams alive of the web developer. Therefore, run to the nearest centre and enroll yourself in the live training sessions.

WHAT YOU WILL BE ABLE TO ACHIEVE DURING THIS COURSE

- Programming with PHP
- PHP language building blocks
- Writing PHP scripts
- Writing Web Pages with PHP
- Interacting with the server
- Manipulation user input
- Applying Advanced Scripting Techniques
- Exploiting he built-in functionality of PHP
- Structuring PHP Code
- Building Complete Web Applications
- Managing errors
- Handling problematic situations

- Establishing database connectivity
- String Manipulation and Regular Expression
- Basic Syntax and programming with PHP:
- PHP with Web Design
- Introducing ARRAY
- Interacting with the file system and the Server
- String Manipulation and Regular Expression
- Reusing Code and Writing Functions
- Object Oriented PHP
- Session and Cookie
- MySQLDatabase and SQL
- Advance PHP Techniques
- JavaScript & CSS
